

50-point grading chart

Whole-point steps | Percentage only | All scores from 100% to 0%

Find points lost; read across to points earned and the percentage.

Read down each block, then continue with the next block to the right.

HOW THIS CHART WORKS

Percentage = points earned / 50 x 100. Values use two decimal places, half-up rounding.

Use equally weighted one-point questions or a total-points assessment. Extra credit is excluded.

No letter grades or pass mark are assumed. Apply your own course policy to the unrounded score.
